GETTING STARTED

BOOT PROCEDURE

v1.0

CONFIG / GETTING_STARTED.EXE

STATUS: READY / USER INPUT REQUIRED

MY SPECS is a compact system manual for the machine used to play games, capture adventures, edit strange ideas, and occasionally stare at settings that definitely worked yesterday.

START-UP PROCEDURE

- | | | |
|---|-------------------------|---|
| 1 | CONNECT HARDWARE | Attach power, display, keyboard, mouse, audio, and one sensible amount of hope. |
| 2 | WAKE THE SYSTEM | Press the power button and wait for the fans to report for duty. |
| 3 | LOAD SOFTWARE | Open the required game, capture software, or creative application. |
| 4 | VERIFY SOUND | If sound does not exist, begin the ancient ritual of checking every cable. |
| 5 | CHECK READINESS | Confirm the game, stream, chair, drink, and human operator are mostly stable. |
| 6 | PRESS START | When everything looks ready enough, begin the session. |

NOTE

If mysterious noises occur, remain calm and pretend this is part of the loading sequence.
